The D-Link DGS-F1006P-E is a 6 port Gigabit Switch with 4 Gigabit PoE ports, 2 Gigabit uplink ports. This Switch enables users to easily connect and supply power to PoE-capable devices such as wireless Access Points (APs), IP cameras.

## Power Over Ethernet

The DGS-F1006P-E supports both IEEE 802.3at and IEEE 802.3af PoE protocol. With a total PoE budget of 60 watts, allowing users to attach an IEEE 802.3af/at-compliant device to the DGS-F1006P-E without requiring additional power. PoE is especially suitable for devices that are far from power outlets or when users want to minimize the clutter of extra cables as power is supplied via the Ethernet cables themselves.

### Switch working mode

Using DIP switch, the working mode of DGS-F1006P-E can be changed

1. **Extend Mode:** 1-4 ports support 250 meters long distance power supply (should be use cat5e or cat6 cable)
2. **VLAN Mode:** Isolating ports 1-4 to each other can effectively suppress network storms and improve network performance.
3. **QoS Mode:** Customize application priority to improve network sensitivity. For example, video priority, monitoring transmission is more smooth
4. **PoE Mode:** Automatically detect the power receiving port, find the dead device, power off and restart the devices
