Setup Wizard

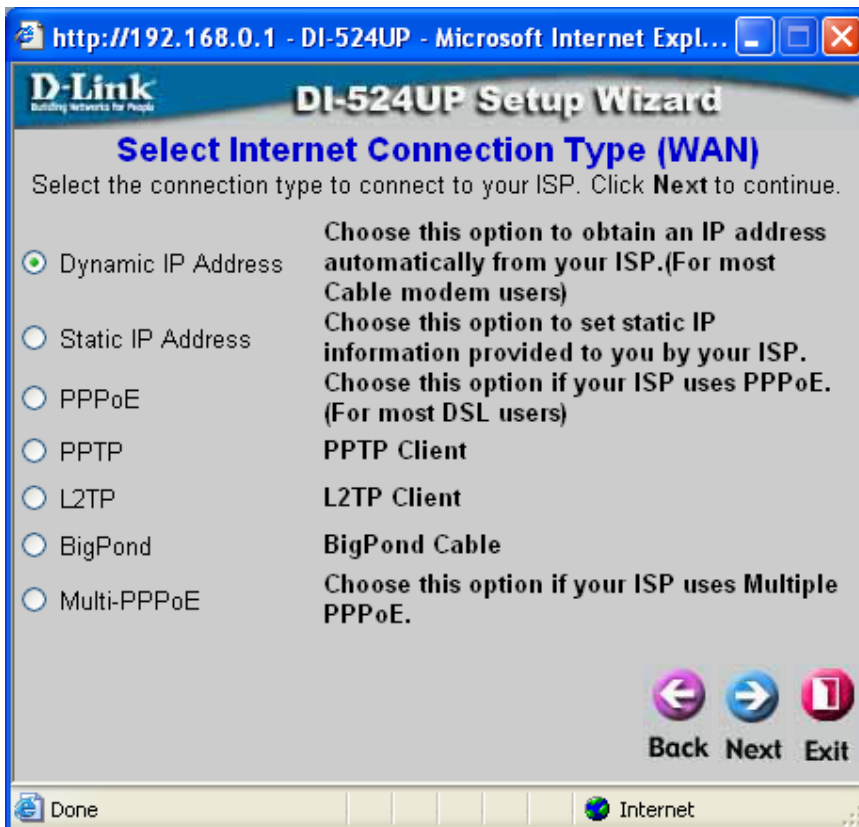

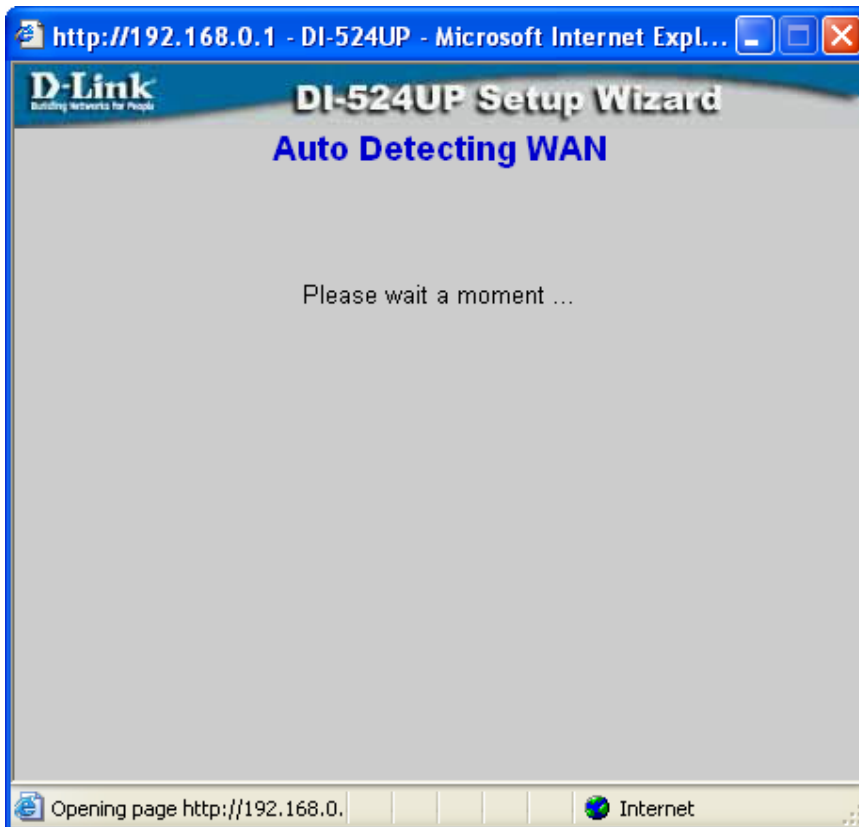

The DI-524UP is a Wireless Broadband Router ideal for home networking and small business networking. The Setup Wizard will guide you to configure the DI-524UP to connect to your ISP (Internet Service Provider). The DI-524UP's easy setup will allow you to have Internet access within minutes. Please follow the setup wizard step by step to configure the DI-524UP.

Run Wizard

Building Networks for People

## DI-524UP Setup Wizard

### Set Dynamic IP Address

If your ISP require you to enter a specific host name or specific MAC address, please enter it in. The **Clone MAC Address** button is used to copy the MAC address of your Ethernet adapter to the DI-524UP. Click **Next** to continue.

Host Name  (optional)

MAC  :  :  :  :  :  (optional)

Wireless Performance

These are the Wireless Performance features for the AP(Access Point)Portion.

TX Rate : Auto (Mbps)

Transmit Power : 100%

Beacon interval : 100 (msec, range:20~1000, default:100)

RTS Threshold : 2346 (range: 1~2346, default:2346)

Fragmentation : 2346 (range: 256~2346, default:2346, even number only)

DTIM interval : 1 (range: 1~255, default:1)

Preamble Type :  Short Preamble  Long Preamble

SSID Broadcast :  Enabled  Disabled

802.11g Only Mode :  Enabled  Disabled

CTS Mode :  None  Always  Auto

Cable Test

Ping Test

Ping Test is used to send "Ping" packets to test if a computer is on the Internet.

Host Name or IP Address  Ping

Block WAN Ping

When you "Block WAN Ping", you are causing the public WAN IP address on the DI-524UP to not respond to ping commands. Pinging public WAN IP addresses is a common method used by hackers to test whether your WAN IP address is valid.

Discard PING from WAN side  Enabled  Disabled

SPI mode

You can setup this item if you want to enable SPI mode.

Enabled  Disabled

IGMP Proxy

Please make sure your multimedia server (service) and Client (player) support IGMP before enabling IGMP Proxy, or it won't perform properly.

Enabled  Disabled

UPnP Settings

You can setup this item if you want to enable UPnP.

Enabled  Disabled

VPN Pass-Through

Allows VPN connections to work through the DI-524UP.

PPTP  Enabled  Disabled

IPSec  Enabled  Disabled

WAN select to 10/100 Mbps

Time	Message
Jan 1 10:00:09	DHCP disconnected
Jan 1 10:00:06	syslogd started ! Log on system activity,attack,drop packet,notice.

Under Advanced Settings:

The screenshot displays the web management interface for a D-Link AirPlus G 802.11g/2.4GHz Wireless Router. The interface is in the 'Advanced' settings section, specifically the 'Advanced Settings' page. The left sidebar contains navigation buttons for 'Device Info', 'Log', 'Statistics', 'Wireless Info', 'Printer Info', and 'Active Session'. The main content area is titled 'Advanced Settings' and includes a sub-header 'Logs can be saved by sending it to an admin email address or to syslog server.' Below this, there are sections for 'Log Type' with checkboxes for 'System Activity', 'Debug Information', 'Attacks', 'Dropped Packets', and 'Notice'. The 'E-Mail Alert' section contains input fields for 'E-mail To:', 'E-mail Subject:', and 'E-mail From:', along with a 'Send Mail Now' button. Further down, there are fields for 'Sender E-mail Address', 'SMTP Server/ IP Address', 'User Name', 'Password', and 'Confirm Password'. The 'Syslog Account' section has a 'Syslog Server IP Address' field and radio buttons for 'Enable' and 'Disable'. At the bottom, there is a 'Save Log File To Local Hard Drive' section with a 'Save' button. The interface concludes with 'Apply', 'Cancel', and 'Help' buttons.
