

Media Converters with Individual Metal Case Housing.

Chassis-based Media Converters

System Overview

The Chassis-based Media Converters include a number of independent media converters and a chassis capable of housing up to 16 media converters. You can start with single media converters, each equipped with its own housing and AC power adapter. When your requirements grow big, you can mount a chassis in your equipment rack and install your media converters in the chassis. The housing of each media converter can be easily removed, and the media converter PC board can be slid into the chassis.

Chassis & Power Supply

The chassis lets you install multiple media converters in an equipment rack together with the network devices for which they provide media conversion. This provides for space saving, and the cabling will look neat. The chassis comes with its own universal AC to DC power supply. For maximum power availability, an optional redundant power supply is available for installation in chassis.

Management Option

You can select to configure your chassis with or without management functions. If you configure it with management, a management module is available for installation in the chassis. It lets you monitor in real-time the status of all media converters and power supplies in the chassis, it also sends out alarms to alert you of all abnormal situations. Management follows

industry standards, including SNMP and http, allowing you to monitor and manage from a third-party SNMP management workstation or via a web browser.

Media Conversion Solutions

The following media conversion solutions are available:

- Fast Ethernet twisted-pair to Fast Ethernet 100BASE-FX fiber (single-mode and multi-mode)
- Fast Ethernet 100BASE-FX fiber multi-mode to single-mode
- 1000BASE-T Gigabit twisted pair to 1000BASE-SX and 1000BASE-LX Gigabit fiber

For fiber cables, MT-RJ and SC types of connectors are supported.

Media Converters Stand-alone or Installed in Chassis

The media converters convert signals capable of transmission on one type of cable to signals capable of transmission on another type of cable. This allows you to connect longer distance fiber cables between devices that are designed only for shorter distance cables, such as the Cat. 5 twisted-pair cable.

All media converters in this system come with their own solid metal case housing, LED status indicators and AC to DC power adapters. They can be used as stand-alone converters, or installed in the chassis. In case you install them in the chassis, you will remove their metal cases and slide in their PC boards into the chassis slots. The chassis's power supply will be used instead of the media converters' own AC to DC power adapters. All media converters are hot-swappable when used with the chassis.

Chassis Features

- 16 bays to house up to 16 media converters
- Front panel LEDs for bay and fan power status
- Standard 19-inch rack-mountable with, 2U height
- Non-stop operation & minimal downtime
- Allows hot-swapping of media converters
- Hot swappable redundant power supplies
- Cooling fans on back side (together with power supplies)
- 1 universal internal AC to DC power supply provided
- SNMP and web-based management capabilities (optional)
- Second AC to DC power supply for load-sharing purpose (optional)
- Media converter power isolation for electrical isolation from each bay

DMC-1002 Management Module

This module provides SNMP-based and web-based management of all media converter and power supply modules installed in the DMC-1000 chassis. It features a 32-bit, high performance RISC microprocessor executing a real-time operating system. It provides a 10/100Mbps Fast Ethernet port for network connection, allowing you to configure and monitor the system through an SNMP management station or from a PC running an Internet browser. An RS-232 port is also provided to let you connect to a console (PC) to set configuration.

The management module periodically polls all converters and power supplies in the chassis to collect information regarding status and configuration settings. It also receives traps for events such as module hot-swaps and power failures as soon as they occur, as well as warning traps, upon which alarms may be sounded out to alert you.

Management Module Features

- SNMP and web-based standards
- 10/100Mbps Fast Ethernet port & RS-232 console port
- Real-time display of link, speed, duplex status of media converters
- Menu-driven terminal program provided for management via console port or Telnet
- Built-in SNMP v.1 agent with MIB-II and enterprise MIBs
- Supported traps: cold start, warm start, authentication fail, power fail, fan fail, module insertion, module pullout, port link down and port link up
- Supports factory reset and remote software reboot
- Supports redundant backup of media converters
- Supports remote setting of configurations of Smart Media Converter modules, like LLCF enable, LLR enable, port enable, auto-negotiation enable
- Password protection against unauthorized access
- Configuration setting upload/download through TFTP and the web
- Firmware upgrade through TFTP and the web

DMC-1580SC Smart Media Converter

Supports Single-mode Fiber Cable Distance Up To 80 km

This converter provides intelligent functions like LLCf, LLR, store-and-forward mechanism, back-pressure and 802.3x flow control.

It converts 10/100BASE-TX Fast Ethernet twisted-pair signals to 100BASE-FX Fast Ethernet single-mode fiber signals. Maximum fiber cable distance is 80 km. 1 RJ-45 twisted-pair port and 1 fiber port (SC connector) are provided.

Media Converter Features

- One-channel media conversion between 10/100BASE-TX and 100BASE-FX
- Supports single-mode fiber using SC connector
- Auto-negotiation of speed and duplex mode on 100BASE-TX port
- Supports link pass through
- Supports Auto MDI/MDIX on 100BASE-TX port
- Sliding switch for configuring fixed half/full duplex modes
- Sliding switch for setting to Forced mode or Auto-negotiation
- Sliding switch for setting the speed
- Sliding switch for setting the LLCf, LLR function
- Store-and-forward mechanism
- Back-pressure & IEEE 802.3x compliant flow control
- Full wire-speed forwarding rate
- Front panel status LEDs
- Can be used as a stand-alone device or installed in a chassis
- Hot-swappable when used with chassis
- Manageable through Intelligent Chassis System

Technical Specifications

DMC-1530SC Smart Media Converter

Supports Single-mode Fiber Cable Distance Up To 30 km

This converter provides intelligent functions like LLCf, LLR, store-and-forward mechanism, back-pressure and 802.3x flow control. It converts 10/100Mbps 10BASE-T/100BASE-TX Fast Ethernet twisted-pair signals to 100BASE-FX Fast Ethernet single-mode fiber signals. Maximum fiber cable distance is 30 km. 1 RJ-45 twisted-pair port and 1 fiber port (SC connector) are provided.

Media Converter Features

- One-channel media conversion between 10/100BASE-TX and 100BASE-FX
- Supports single-mode fiber using SC connector
- Auto-negotiation of speed and duplex mode on 100BASE-TX Port
- Supports link pass through
- Supports Auto MDI/MDIX on 100BASE-TX port
- Sliding switch for configuring fixed half/full duplex modes
- Sliding switch for setting to Forced mode or Auto-negotiation
- Sliding switch for setting the speed
- Sliding switch for setting the LLCf, LLR function
- Store-and-forward mechanism
- Back-pressure & IEEE 802.3x compliant flow control
- Full wire-speed forwarding rate
- Front panel status LEDs
- Can be used as a stand-alone device or installed in a chassis
- Hot-swappable when used with chassis
- Manageable through Intelligent Chassis System

- CE Class B

DMC-920 Media Converter

This media converter combines transmit and receive signals onto one fiber strand using two wavelengths. This design avoids the budget losses incurred by the single-wavelength single-fiber technology, and minimizes the possibility of reflections in the system. The units on both ends of a link are different. One module uses one wavelength to transmit and a second wavelength to receive, while the other module flips that relationship. For this reason these units are used in pairs.

A pair of one-channel single fiber is used for media conversion between 10/100BASE-TX and 100BASE-FX. Two different transmitting wavelengths, one wavelength with bi-directional for both transmit and receive.

- DMC-920R: This media converter provides 1310 micron for TX, 1550 micron for RX.
- DMC-920T: This media converter provides 1550 micron for TX, 1310 micron for RX.

Fiber cable support is 9/125um, 10/125um single-mode fiber, maximum 20 km cable distance.

Media Converter Features

- Auto negotiation of speed and duplex mode on TX port
- Auto MDI/MDIX on TX port
- One slide switch for configuring fixed half/full duplex modes
- Store-and-forward mechanism
- Back-pressure & IEEE 802.3x Flow Control compliant
- Full wire-speed forwarding rate
- Front panel status LEDs
- Can be used as a stand-alone device or with chassis
- Hot-swappable when used with chassis
- Manageable through Intelligent Chassis System

DMC-700SC, DMC-810SC Media Converters

DMC-700SC Media Converter: This converter converts 1000BASE-T Gigabit twisted-pair signals to 1000BASE-SX Gigabit multi-mode fiber signals. Maximum fiber cable distance is 550m. 1 RJ-45 twisted-pair port and 1 fiber port (SC type connector) are provided.

DMC-810SC Media Converter: This converter converts 1000BASE-T Gigabit twisted-pair signals to 1000BASE-LX Gigabit single-mode fiber signals. Maximum fiber cable distance is 10km. 1 RJ-45 port and 1 fiber port (SC type connector) are provided.

Media Converter Features

- One-channel media conversion between 1000BASE-T and 1000BASE-SX/LX
- Auto negotiation of duplex mode on twisted-pair port
- Auto MDI/MDIX for twisted-pair port
- Full wire-speed forwarding rate
- Front panel status LEDs
- Can be used as a stand-alone device or with chassis
- Hot-swappable when used with chassis
- Link Pass Through function

DMC-515SC, DMC-530SC, DMC-560SC Media Converters

These converters convert 10/100Mbps 10BASE-T/100BASE-TX Fast Ethernet twisted-pair signals to 100BASE-FX Fast Ethernet single-mode fiber signals. Maximum fiber cable distance is 15 - 60 km. 1 RJ-45 twisted-pair port and 1 fiber port (SC connector) are provided.

- DMC-515SC: this media converter supports maximum 15km fiber cable distance.
- DMC-530SC: this media converter supports maximum 30km fiber cable distance.
- DMC-560SC: this media converter supports maximum 60km fiber cable distance.

Media Converter Features

- One-channel media conversion between 10BASE-T/100BASE-TX and 100BASE-FX
- Fiber SC connector
- Auto negotiation of speeds and duplex modes on twisted-pair port
- Auto MDI/MDIX
- One slide switch for configuring fixed half/full duplex modes
- Store-and-forward mechanism
- Back-pressure & IEEE 802.3x Flow Control compliant
- Full wire-speed forwarding rate
- Front panel status LEDs
- Can be used as a stand-alone device or with chassis

DMC-615SC Media Converter

This converter converts 100BASE-FX Fast Ethernet multi-mode fiber signals to 100BASE-FX Fast Ethernet single-mode fiber signals. Maximum fiber cable distance is 15km. 2 fiber ports (SC connectors) are provided.

Media Converter Features

- One-channel media conversion between 100BASE-FX multi-mode to 100BASE-FX single-mode fiber
- 2 fiber SC connectors
- Store-and-forward mechanism
- Full wire-speed forwarding rate
- Front panel status LEDs

DMC-300M, DMC-300SC Media Converters

These converters convert 10/100Mbps 10BASE-T/100BASE-TX Fast Ethernet twisted-pair signals to 100BASE-FX Fast Ethernet multi-mode fiber signals. Maximum fiber cable distance is 2km. 1 RJ-45 twisted-pair port and 1 fiber port are provided.

- DMC-300M: the fiber port on this media converter is the MT-RJ connector.

- DMC-300SC: the fiber port on this media converter is the SC connector.

Media Converter Features

- One-channel media conversion between 10BASE-T/100BASE-TX and 100BASE-FX
- Fiber MT-RJ or SC connector
- Auto negotiation of speeds and duplex modes on twisted-pair port
- Auto MDI/MDIX
- One slide switch for configuring fixed half/full duplex modes
- Store-and-forward mechanism
- Back-pressure & IEEE 802.3x Flow Control compliant
